CONFIDENTIAL GETT/CONTROL - U.S. CFFICIALS COLY

50X1-HUM

CENTRAL INTELLIGENCE AGENCY

∞ 2 ∞

c. Spring steel (0.5-1.5 mm.) for wood saws.

d. Crucible castings or sheet steel 2.3 mm. for blades of agricultural machinery,

e. Sheet metal 3.6 and 10.12 mm. for ploughshares.

Flat steel for ploughs and shares, measuring 25 x 6, 30 x 8.10, 60 x 20, 65 x 16 and 70 x 16 cm.

Engineering Machinery

The following steels are needed:

a. Steel for general purposes, without any special characteristics.b. Steel for crankshafts and drawing rods under medium stress.

- c. Steel for parts of driving mechanisms under little stress, heavily loaded shafts, driving shafts, angled (Gekropt) crankshafts, starting eranks, and boring spindles.
- d. Steel for use as listed under c. but for greater stress, namely for parts where space and weight must be saved, as for example in airplane parts, lathe spindles, etc.

e. Steel for unhardened parts working against one another, such as rudder parts , hard rollers, slip-rings, etc.

- Steel for moving parts, subject to great stress, which must have hardness on parts of the surface for durability.
- g. Fine sheet metal for covers, caps, protective plate, etc.

h. Thick sheet metal for welding construction.

Transport Industry

The following steels formerly came from the west and are now lacking: steel bars, tool steels, high speed steels, motorcar springs, steel piping and boiler plates.

Other requirements are steel rivets, wheel sets, thin wire, tin, measuring tools, mutical instruments for "Seiner", and grinding wheels.

Electrotechnics

A list is given of the materials which "must be imported from the west":

| a, | Electrolytic condensers | et est | 12,000 | |
|----|-------------------------|---------------|----------|--|
| | (8 micro fared) | | | |
| b. | Chrome nickel wire | 4:0 | 500 kg. | |
| C. | Silver | cos | 15 kg. | |
| d. | Mercury | es. | 40 kg. | |
| e, | Magnet steel | ero | 10 tons | |
| £. | "Trafo" plate | 2504 | 30 tons | |
| B. | Nickel alloys | r. 793 | 50 kg. | |
| h. | Fine sheet plate | 629 | 40 tons. | |
| î. | Steel castings | **** | 35 tons | |
| Ĵ. | Steel bers | tras | 5 tons | |
| k. | Steel strips | cap . | 35 tons | |
| 1. | Acetate silk | ciap | 2 tons. | |
| | | | | |

Precision and Optical Instruments

A list is also given of these materials, which "must be imported from the west":

| Ð., | Chrome nickel wire | 643 | 40 kg. |
|-----|-------------------------|------------|--------------|
| b., | Silver | C9/22 | 8 kg. |
| e. | Steel bars | Get | 45 tons |
| d. | Steel pipings | ca: | 8 tons |
| Θ, | Sheet metal | 6113 | 24 tons |
| Ţ, | Nickel | ess. | 3.6 tons |
| g. | Mercury | cara . | 2 tons |
| | Fine gold | cons | 0.1 kg.(sic) |
| i. | Steel for watch springs | æa | 1.25 tons. |
